

Association of Persian Agenda21 EcoSan activities

Ecosan activities launched their activities after having participated in the 2nd international symposium on ecological sanitation in Germany in 2003.

In Cooperation with civil society and governmental organization of Tehran , Khuzestan and Kourdestan deputies in Islamic Consultative Assembly of Iran, ecosan organized official and public meetings accompanied with the related workshops in cities: Tehran, Sanandaj, Ahwaz & ... to introduce the world wide system of Ecological- Economical Sanitation Technology in December 2003. ecosan/gtz- Germany and ecosan- Iran has attempted to introduce ecological sanitation by setting out workshops, meetings and aims to implement ecosan system in Iran.

As Iran is considered a Moslem country, and water is necessarily used for anal cleaning and *Taharat*, some special measures should be taken to promote and apply ecosan in Iran. While considering different projects implemented in different countries, ecosan-Iran attempts to design a particular system to be applied and promoted in Iran.

Some of Iranian EcoSan Group's activities by APA21 & EWB-I:
